Email: cekdarcapar@gmail.com
Birth Date: 23.02.1998, Mersin

SUMMARY

After graduating from university, I started my work life and worked as an intern at the Customs Consultancy office for a short period. I started learning Adobe Premiere Pro and changed my field of work and decided to become a Social Media Specialist. I became interested in software while working at social media, and received a lot of training on it. At first, I received game development training with Unity and 7 months later published my first game on Google Play. To receive professional training, I attended Software Specialist training (250 hours) from Arı Bilgi Educational Institution. This training laid a good foundation for me and I am currently developing many projects for my own development.

PROJECTS

Meeting Room Reservation - https://github.com/cekdarcpr/Reservation_Proje01

Developed a comprehensive reservation system for meeting rooms using ASP.NET. The system included several key features:

- **API Integration:** Integrated APIs to streamline data exchange and communication between different modules of the system.
- **Dashboard:** Implemented a user-friendly dashboard interface for easy navigation and management of reservations.
- **Admin Panel:** Created an admin panel with advanced functionalities such as user management, room allocation, and reporting.
- **Reservation Functionality:** Developed the core functionality for users to book meeting rooms, manage bookings, and receive notifications.
